Experience

Furl

Software Engineer — *Dec 2022 – Jun 2026*

As the first full-time engineer hired at an early-stage startup, I was an integral part of building an AI-powered cybersecurity product that secured a $10 million seed round. I also worked with LLM tools like Copilot, Cursor, and Claude Code, creating skills and AI-friendly workflows to accelerate development.

Main tools & skills: *Go, SQL, React, Typescript, AI/LLM-assisted development, harness engineering*

Experian

Software Developer — *Sep 2020 – Dec 2022*

I was one of two developers involved in turning a medical appointment reminder application from a proof-of-concept into a fully-featured product with a RESTful API and frontend UI. I also facilitated Scrum ceremonies, trained coworkers to write acceptance criteria, and created an Agile development standard that was adopted by sixteen teams.

Main tools & skills: *C#, .Net, SQL, React, Typescript, Agile software development*

Medhost

Software Developer — *Nov 2018 – Sep 2020*

I fixed bugs in a patient portal application for rural healthcare providers. I also helped create an internal tool to reduce time spent on monthly billing reports by gathering requirements, pitching the idea, and demoing the final product.

Main tools & skills: *Java, SQL, debugging*

Education

Nashville Software School
Full-Stack Web Development

Vanderbilt University
BS Economics, BS Spanish
